EDUCATION

Intern/Trainee Frontend Developer

HYS Enterprise

2022-2023

Professional training and advanced training in the field of Frontend development. Detailed study of **JavaScript/TypeScript** and **Angular**.

LANGUAGES

- English
- Ukrainian

PROFILE

Frontend developer with **2 years of experience** working with the **Vue** framework. I specialize in building reliable, scalable applications using **Vue** and **Nuxt** technologies. Taking the lead in organizing and improving team processes, I have experience in a **Team Lead** leadership role.

WORK EXPERIENCE

Frontend Developer

Market Making Pro Group

Full-time, 03.2023 - now

Achievements and responsibilities:

- Conducting the full development cycle of **5 high-quality adaptive landing** pages (from initialization to launch of the final version) and applying the best UI practices that **improve user experience**.
- Constant **support** and **debugging** of **2 projects** using the Nuxt.js stack.
- Experience in **leading development processes** in a team. Assuming leadership **during critical developer shortages** to maintain development cycle and project momentum, achieving key milestones on time and with high customer satisfaction.
- Implementing a **component-based approach** across all projects to **ensure the best possible code base**.
- **Establishing the correct file structure** in accordance with Nuxt best practices.
- Improved code quality and readability by implementing HTML5 **semantic** tags to **ensure compliance with W3C standardization**.
- Writing and maintaining **technical documentation** from scratch for all Nuxt projects I've worked on.
- **Global refactoring of legacy** Nuxt.js projects to provide the best performance and user experience.
- Research of critical vulnerabilities and optimization problems and their subsequent elimination. **Improvement of SEO optimization** of projects by an **average of 40%**.
- All projects and tasks were **delivered on time** within the specified deadline.
- Configuring i18n multilingual capabilities for Nuxt 3 and Nuxt.js projects. This indicator is very important because it increases the involvement of multilingual target audiences and **increases the accessibility of projects**.

Tools & technologies: Nuxt, Vue, JavaScript, TypeScript, i18n, ESLint, Prettier, Webpack, Vite, Vuex, Pinia, JIRA,

Frontend Developer

ZimaBank Company

Part-time, 10.2023 - now

Achievements and responsibilities:

- **Support** and **debugging** of **2 company projects** using the Nuxt.js stack.
- **Development from scratch** of **2 projects** on Nuxt 3, related to the fintech sector and demonstrating the company's products and services.
- Major refactoring of one of the projects. **A serious problem** with working with DOM elements **has been resolved**. This allowed us to **optimize and reduce resource costs by 4 times**. The **Bootstrap** and **jQuery** libraries **were also removed** and the corresponding code was replaced in order to **change the approach to development** and **reduce dependencies**.

Tools & technologies: Nuxt, Vue, JavaScript, TypeScript, i18n, ESLint, Prettier, Webpack, Vite, Vuex, Pinia, Asana
